PROJECT EXPERIENCE

Keyboard Vault — *Inventory & POS Application*

C# · SQLite · Windows Forms

- Developed a desktop POS system with role-based authentication, account creation, product browsing, and real-time inventory updates.
- Added manager tools for product, pricing, discount, and sales/returns control.
- Applied multithreading for smooth, high-volume performance, improving inventory accuracy and transaction efficiency.
- Repo: [Keyboard Vault](#)

Travel Stay — *Lodging Reservation System*

Java · Microsoft SQL Server · IntelliJ IDEA

- Built a lodging management app with secure login, booking history, and lodging management (updates, images, availability).
- Created customer features for browsing, booking, and viewing lodging details.
- Implemented a Java Swing GUI with OOP design, threading, and SQL Server integration for fast database operations.
- Repo: [Travel Stay](#)

WORK EXPERIENCE

Lead Server / Manager — *The Social House, Fort Worth TX*

Mar 2021 – Present

- Supervised and trained staff to maintain consistent performance in a high-pressure environment while fostering a collaborative and supportive work culture.
- Managed sales reporting, cash handling, and customer service with accuracy, attention to detail, and strong problem-solving skills under tight deadlines.
- Adapted quickly to shifting priorities and resolved issues efficiently to ensure smooth operations and customer satisfaction.
